

**Project introduction №1**

<b>Project title :</b>	<b>CONSTRUCTION WORK OF THE WATER SUPPLY SYSTEM AND CENTRAL TUNNEL</b>
<b>Project basis :</b>	Identify prospects for the future of needs for administration , bureaus, organs, industries, enterprises and residence which are located in Altanbulag FTZ and center of Altanbulag sum then plan the wather supply system. Those are based technical and economical indexes for the “Altanbulag” FTZ’s Master Plan and General Plan.
<b>Projects goals :</b>	To supply with the water to the Altanbulag FTZ, indigenous people, industries, trade and service organs. To construct the complex tunnel and main line, general line this is connected to the water pond.
<b>Project importance :</b>	To create the complex tunnel of water supply system To build a line between water pond and water resource
<b>Total expenses of the project :</b>	4.5 mln USD
<b>Cooperation mode:</b>	Investment
<b>Project venue:</b>	Altanbulag sum of Selenge province, Mongolia

**Project introduction № 2**

<b>Project title :</b>	<b>TO CONSTRUCT A HEATING STATION AND NETWORK OF THE HEAT SUPPLY.</b>
<b>Project basis :</b>	According to the master plan and general plan of the Altanbulag, heat consumption of Altanbulag FTZ and center of the sum are total 84.4 ggal /hour or 98.2 megawatt. Heat supply will be planned according to the calculation of prospects to the future demand of Altanbulag FTZ, official organization, industries, economic entities and accommodations. Heat supply will be planned according to the calculation of prospects for the future demand of Altanbulag FTZ official organizations, industries, economic entities and accommodations. It will be based on the technical and economic indexes for the master plan and development plan of Altanbulag FTZ, general plan of the sum.
<b>Projects goals :</b>	To supply with the heat, hot water, process (engineering) steam to the constructions of the FTZ and accommodations of the sum, other organs.
<b>Project activities:</b>	Heating station will be constructed: To install the 5.6 km heating line in the FTZ To install the 3.5 km heating main line in the center of the sum.
<b>Project scale :</b>	130 megawatt – Heating station will be constructed.
<b>Total expenses of the project :</b>	18.0 mln USD
<b>Cooperation mode:</b>	Investment
<b>Project venue:</b>	Altanbulag sum of Selenge province, Mongolia
