

PROJECT PROPOSAL № 6

Project name	MIXED PILL FERTILIZERS
Project background	<p>~ Since in Mongolia was developed an agricultural field, about 45 years went away. During this time, activities for keeping nutritional capacity of the soil and supplying required fertilizing substances were implemented very insufficiently. Fertilizers supply was implemented but it covered only 5 percent of whole demands because there was no fertilizers industry in Mongolia. Research materials and studies of scientists say that on account of yields in 1960-1998, 12413299 t of nitrogen, 4904219 t of phosphate, and 9951288 t of calcium were lost but fertilizers of 29,5 % nitrogen, 49,3% phosphate and 87,3 % calcium were not recovered the yielded earth. Therefore 46% of total 1.3 million hectare yielded earth was degraded. Based on the conclusion for testing soil nutritional balance, it is required 52,9-70,5% nitrogen, 50,7% phosphate and 52.7-87.5% calcium in order to harvest. Therefore we think that to develop the agricultural field, take big yielded and qualified harvesting, and to keep soil nutrition, the fertilizers industry has to be built in the country.</p>
Project objective	<p>~ It resides in establishing the fertilizers industry in Mongolia, increasing the harvesting yield by 1-15, providing low priced and qualified fertilizers to herdsmen and developing agricultural field within a program to be promoted by the government.</p>
Activities to be purposed within the project scope	<p>~ Construction works for the industry ~ Buying equipment and technique ~ Expenses for production</p>
Project sufficiency	<p>~ The successful implementation of the project will improve nutrition of harvested earth, increase income of farmers and encourage their living standard.</p>
Responsibilities of Mongolian part	<p>Following activities have to be implemented in order to complete the project efficiently.</p> <ul style="list-style-type: none"> - The industry premise has to be finished within the prescribed time. - The loan sufficient consumption will be promoted and controlled. - Sales will be promoted and encouraged.
Total project cost	1 million USD
