

Project Proposal 15

Project title:	EGIIN GOL HYDROPOWER PROJECT
Project background, project outline:	For sustainable energy supply and improvement of Central Grid system, and to build independent energy supply subsidies importing energy
Production scale:	<ul style="list-style-type: none"> - Installed capacity 4 x 55 MW = 220 MW - Firm energy 412 mln. kWh per year
Market orientation and market analyses, market survey	The feasibility study was carried out and it covered all economic studies.
Cooperation mode:	Any mode can be accepted and preferably BOT,
Total investment:	282 million US\$
Project venue, construction venue:	Egiin river, Khutag Undursoum, Bulgan province
Occupation area and construction area:	Capacity 4000 mln. cub. meters Egiin Reservoir will be about 50 km long have a maximum surface area of 125 km ² . Reservoir height will be 95 m. installed capacity - 220 MW, 75x37.5x26wi measured construction with 4 turbine generator.
Estimated economic benefit	EIRR - 13 %
Investment recovery period:	8 years
Enterprise name:	Energy Research and Development Center of Ministry of Fuel and Energy,
Ownership:	State owned
Enterprise outline:	Policy planning, implementation and coordination of fuel and energy sector policy,
Address:	Government Building 2, United Nation's Street-5/2, Ulaanbaatar-2 10646
Telephone/Fax:	976-1 1 -31 -81-69
E-mail:	mcddd_d@yahoo.com,
