

Project name:	“AIRPORT CITY”
Applicant:	Ministry of Construction and Urban Development, The Government of Mongolia
Type of finance:	Private and Public Investment
Sector:	Urban Development Sector
Project type:	Establishing of new Airport City
Target site:	Khosigtiin hondii, Central Province, near to the Capital Ulaanbaatar city /40 km from UB/, Mongolia
Project basis:	<p>~ Due to the geological and socio-economic feature, the air transportation, both international and domestic, has been playing an important role for Mongolia. Master Plan for Civil Aviation Sector in 2003 examined the condition of the Chinghis Khan International Airport, and recommended the immediate action to develop the new Ulaanbaatar International Airport. Under these circumstances, the Government of Mongolia has endorsed the New Ulaanbaatar International Airport Construction Project as one of the highest-priority projects.</p> <p>~ In connection with it establishing of new International Airport City is becoming as one of important key factor on Urban Development issues. The proposed Airport City will become not only as a center for international and domestic tourists and high level service for air transportation, it will become as a International level center of the Science and High technologies as well.</p> <p>~ The management and investment of establishing of the Airport City will rely on PPP /Public and Private Participation/.</p>
Project goals:	The project aims to establish the new International level Airport City
