

Project title:	PROJECT FOR WATER SUPPLY OF ERDENET CITY
Applicant:	Government of Mongolia, Ministry of Construction and Urban Development,
Sector	Grant
Project type:	Construction of facilities with provision of necessary equipment
Type of finance	grant
Requested amount:	17.6 mln USD
Target site:	Orkhon province, Erdenet city, Mongolia
Project basis:	<p>In the case of erdenet, as is described later on, the municipal water supply services distributes water to citizens based on receipt of between 17,000-25,000 m³/day of water from the industrial water system on the Erdenet Mining Company. However, the level of water supply is unable because water supply to the city has been reduced and the company has raised the water rate.</p> <p>Service interruptions sometimes occur during water demand times, thereby having a major impact on the everyday lives of citizens. Moreover, due to the deteriorated state of facilities, frequent rehabilitation works are necessary and the resulting costs place additional pressure on the waterworks budget. Water authorities in all cities household accounts, the tariff increase are not being widely accepted. In the case of Erdenet, the rate popululation increase.</p>
Project goals:	<p>The project aims to newly develop the city water facilities of Erdenet. Baccuse the city water utility of Erdenet was originally operated in combination with the industrial water supply of the state enterprise Erdenet Mining, the financial burden of the city water utility was light.</p>
