

<b>Project title:</b>	<b>UALAANBAAT WATER SUPPLY DEVELOPMENT IN GACHUURT</b>
<b>Applicant:</b>	Government of Mongolia, Ministry of Construction and Urban Development,
<b>Sector</b>	Grant
<b>Project type:</b>	Water supply and Sanitation Sector
<b>Type of finance</b>	grant
<b>Requested amount:</b>	21.7 mln USD
<b>Target site:</b>	Capital city of Mongolia, Ulaanbaatar
<b>Project basis:</b>	The piped water supply for Ulaanbaatar city using groundwater which has 240,000 m <sup>3</sup> /day capacity for water supply as end of 2006. But this 240,000 m <sup>3</sup> /day is estimated to meet the water demand of 2011 year due to increasing a population continuously. The development and improvement of the water supply for Ulaanbaatar city would contribute to the socioeconomic development of these strategically important capital city of Mongolia, and turn to the more balanced development of the national land sicio-economy.
<b>Project goals:</b>	To improve the water supply services for citizen in Ulaanbaatar ccity including the Ger areas through: development of new water source for safe drinking water with disinfection. To contribute to the improvement of financial conditions of the Water supply of Ulaanbaatar city through the reduction of operation and maintenance costs with the new facilities.
