

E-MONGOLIA PROGRAM

Consequently, the government is adopted “E-Mongolia” national program 2004-2012. This policy aims to establish the information society and the foundation of the knowledge based society in Mongolia by enhancing extensive application of ICT in all society sectors. By 2012 Mongolia becomes one of the top ten ICT developed countries in Asia

“e-Mongolia” program as a nation-wide program on ICT sector development in the country. In addition, the action plan of the coalition Government gives a superior significance to ICT sector and puts forward many important respective objectives.

name	E-MONGOLIA
Preface	<ul style="list-style-type: none"> ~ Today, the role of Information and Communication Technologies (ICT) in development has been recognized by businesses, governments and individuals around the world. It has spawned entirely new industries, transformed existing ones, and become a global cultural phenomenon. ~ The ability to communicate and exchange information instantaneously and across vast distances has enabled more individuals and businesses to participate in the economy, regardless of their location. The ICT is literally enabling some developing countries to “leapfrog” the industrial revolution and jump straight to the Information Age. ICTs provide Mongolia with the opportunity to develop its economy, reduce poverty and improve the quality of life of the people.
Vision	<ul style="list-style-type: none"> ~ Therein, information and knowledge circulate at unprecedented speed and affect all aspects of life and economic, political and social activity. In this information age, it is the ability to use effectively and efficiently the information and communication technologies that determine a country’s competitiveness and relevance in the global economy. ~ Mongolia cannot remain at the margins of this world revolution. ~ Unfortunately, Mongolia has the low teledensity especially in rural areas and few computers and Internet users, thus depriving citizens of what in most parts of the world is accessible by a mouse click or the touch of a keyboard. For the country to be competitive, this situation must change drastically. ~ Consequently, the government is adopted “E-Mongolia” program 2004-2012.
Scope	<ul style="list-style-type: none"> ~ This policy aims to establish the information society and the foundation of the knowledge based society in Mongolia by enhancing extensive application of ICT in all society sectors. ~ By 2012 Mongolia becomes one of the top ten ICT developed countries in Asia
	<ul style="list-style-type: none"> ~ Joint effort of Mongolia government, private sector, academic and scientific communities with valuable aid and support from donors and international organizations have accelerated ICT sector development significantly
