

## **BREEDING FARM OF DAIRY GOAT**

### **Project outline**

Project background: Mongolians often use goat milk. Native goats have low yield of milk producing annually 30 to 40 litters. To improve living standard of poor households and increase dairy products the breeding of dairy goats will open broad opportunity.

Marketing Analyses: There are more than 30,000 goats in the region of Ulaanbaatar city and resident. Have much interest to grow dairy goats. Therefore, dairy goats will be imported from overseas country and form dairy goat's flocks by hybridization of them with native goats.

Product Scale: The first dairy goats will be obtained in Mongolia. Annually a purebred goat produces 500 to 600 liters' milk and hybrid goat produces 200 to 300 liter milk. Number of milk producing goat does will be 30 heads fore purebreds and 320 for hybrids. Offspring's will be obtained from 1000 Mongolian goats by using biotechnological method. The activities will become stable by fifth year.

Cooperation mode: Foreign investment will account for 30%

Total investment: US\$ 46,000

What is needed from overseas investment: 30 dairy goats does capable of producing 1,000 liter milk per annum, 10 bucks, machinery's, laboratory equipment and biological required for breeding of goats, as well as expenditures for transportation.

Construction venue: In the area of Khan-Uul district 30 km far from Ulaanbaatar city.

Occupation area and construction area: Square of total area of the project possession and square of the building: 70ha for total possession and 5 ha for animal housing.

Estimated economic benefit: Preliminary calculation of expected economic effectiveness:  
Sale US\$ 16,060

Production expenditures US\$ 7,000

Taxation US\$ 3040

Profit: US\$ 6,020

Estimated investment profit rate: -Investment recovery period: - Totally US\$ 46,000 will be repaid for 8 years.

Project progress: Requested documentation-All are completed and attached to the project.

### **Introduction to the Mongolian partner**

Enterprise name: Dashdamba Bataa “ Kheer -Aduu”, private company.

Ownership: Private

Enterprise outline: Breeding of pig and dairy cow.

Proposed offer to the project: Animal housing, labor force, fodder expenditures for breeding of goat in the project will be provided.
